### How to make an appointment

Our staff is ready to assist your in the process of making an appointment. Please call our Annapolis Office to make an appointment for either location 410-224-0121. Dr. Jay McDonnell will perform a neurological examination on your pet. A neurological examination is a historical and specialized examination that encompasses all body systems and their interactions with the nervous system. Allow one hour for your appointment. Recommendations will be discussed following the neurological examination. In the event your pet is hospitalized with us for further observation, diagnostics or treatment, a thorough itemized estimate for these services will be provided to you. We ask that you arrive 10-15 minutes prior to your scheduled appointment. Our staff is here to assist you and your pet when you arrive should you require special assistance.
